The island of Sardinia is only 12 km away. The tour continues in the old town, where you will stroll through the maze of narrow, winding streets, passing fascinating historical sites such as the 16th century Bastion de L'Etendard and the 12th century Eglise Sainte-Marie Majeure. After some time at leisure, return to the marina and walk back to the ship.

Boating

A specially chartered boat will meet you at the pier. After boarding the boat, you will set off to explore the coast, leaving the harbour through a narrow channel between the towering cliffs of Bonifacio. The boat will pass the "Madonetta" lighthouse, built in 1854, and from the outside you can see the "Sdragnato" or "Little Dragon" sea cave. The itinerary continues to the "Fazio Creek" and then, following the cliff in a south-easterly direction, you will pass the rock known as the "Rudder of Corsica" and the steps of the King of Aragon. According to legend, these steps were carved out by the Aragonese during a single night in 1420 to facilitate a surprise attack on the inhabitants during the siege of Bonifacio. However, they predate this event and had a much more mundane function, allowing the locals to carry water up to the citadel.

The final highlight of the tour is the "Grain of Sand" rock, a large, isolated rock formed by erosion, which stands about 10 metres out in the sea. This picturesque site will make you reach for your camera as it provides the perfect backdrop for a photographic souvenir.

Please note: The boat is chartered exclusively for Star Clippers' guests. Tour timing and itinerary are subject to sea conditions.

Dress for the weather and bring a hat, sunglasses and water.

Active & Adventure | Nature

This is a must for nature lovers, the wildlife is abundant in this protected area and the coastal views are simply stunning! A short 15 minute drive will take you to Es Grau, a typical Menorcan village in the middle of S'Albufera Natural.

The park includes the wetlands, a marshy coastal area consisting of a 2km long lagoon surrounded by a system of dunes and a river that flows into the sea. You will be taken on an itinerary designed to showcase the flora and fauna of the wetlands. The park is home to a wide variety of bird species; waterfowl such as ducks, coots, herons and shags live alongside birds of prey such as ospreys, kites and booted eagles, while the streams and ponds of the wetlands are populated by Iberian green frogs and toads. The vegetation consists mainly of wild olive trees, holm oaks, lentisk, jasmine box and tree spurge. The route takes you along the Cami de Cavalls, a bridleway that goes around the island, through the woods and then along the water reserve that leads to the beach of Es Grau. From here, follow a winding path up to the headland overlooking Isla Colom off the north coast. Continue down to Cala Tamarells before returning along the beach to the village of Es Grau.

Please note: This tour is suitable only for active guests, as it involves extensive walking over natural terrain (approx. 5 km walk).

The first stop on the tour is Monte Toro; at 357m it is the highest point on the island and the views are absolutely breathtaking, on a clear day you can see Mallorca to the south-east. The site is considered the spiritual centre of Menorca and has been a place of pilgrimage since the 13th century. The remains of an old Augustinian monastery are still visible and there is a small church with a carved wooden image of the Virgen del Toro, the patron saint of Menorca. Legend has it that Monte Toro takes its name from a bull (el toro) that led a group of monks to a statue of the Virgin Mary carved into the rock face.

The route continues to Torralba d'en Salort, a prehistoric Talaiotic settlement dating from 2000-1000 BC. The taula is made up of two rock slabs, one on top of the other, forming a "T". The monument is more sophisticated than many other prehistoric constructions and is generally believed to have been used as a sanctuary. The taula is unique to Menorca and, despite the shared Talayotic heritage, there is nothing comparable in Mallorca.

Afterwards, the coach will return to Mahón and the participants will leave the coach and walk through the 18th-century town (mostly downhill) to reach the pier.

Please note: This tour involves moderate walking (approx. 2.5 hrs) over uneven surfaces and some inclines.

Dress for the weather, wear comfortable walking shoes and bring a hat and water.

Estimated driving times: 30min between the cruise pier and Monte Toro; 30min between Monte Toro and the archeological site; 20min between the archaeological site and Mahón. Arrived in Mahón city center, the visit continues on foot back to the cruise pier.

The tour departs from the port of Motril to "Las Alpujarras", one of Spain's most spectacular regions, where ancient villages cling to the mountainsides on the southern slopes of the Sierra Nevada. The Alpujarra is famous throughout Spain for its unique mini-ecosystem. Its terraced farmland is constantly irrigated by melting snow from above, creating a high-altitude green oasis that contrasts dramatically with the arid foothills below. The region's cultural interest lies in its fifty or so villages, which were the last stronghold of the Spanish Muslims, or Moors.

The village of Pampaneira, situated at around 1,500 metres above sea level, has retained its traditional Berber architecture with terraced clusters of grey-white box-shaped houses with flat clay roofs.

We then drive to the village of Capileira at the top of the valley. The name is an Arabic derivation of the Latin word for 'head' or 'top'. Here you will see rocky streets, overhanging corridors and sagging stone houses that have not been rebuilt or embellished for modern living. Before returning to the pier in Motril, we will stop for a delicious lunch at the Hotel Mecina Fondales.

Please note: This tour involves a lot of driving on winding mountain roads. Estimated driving times: 90 min between Motril and Pampaneira; 15min between Pampaneira and Capileira, 45 min between Capileira and Mecina; 90min between Mecina and Motril. Depart the ship and head north towards the Spanish border. On the way you will cross the airstrip completed in 1942 and used by General Eisenhower during Operation Torch, the Allied invasion of North Africa. The minibus then heads to Europa Point, the southernmost point of Gibraltar.

On a clear day you can see across the Straits to North Africa, including Ceuta and the Rif Mountains of Morocco. From Europa Point, continue to the Great Siege Tunnels and visit this labyrinth of tunnels inside the Rock of Gibraltar.

During the Great Siege, the gallant defenders were stunned when the Spanish and French besiegers dug trenches too close to Gibraltar for the British to fire on them. Imaginative solutions were needed, and Sergeant Major Ince suggested digging tunnels to reach a rock outcrop so that the British guns could fire sideways at the attackers.

As the tunnel was dug by hand through the solid rock, the dust was so stifling that air vents were created, and it was then realised that these holes would make excellent embrasures for guns. The Great Siege Tunnels are a testament to British ingenuity, sheer courage and determination, and perhaps the most ingenious defence system devised by man in 1783. Finally, take a transfer back to the pier.

Please note: There will be driver-guides on the tour. This tour involves a lot of walking through tunnels and over hilly and cobblestone terrain. The order of the visits is subject to change.

On a clear day you can see across the Straits to North Africa, including Ceuta and the Rif Mountains of Morocco. From Europa Point the walk continues to the Upper Rock and St Michael's Cave.

The cave was formed when rainwater slowly seeped through the limestone, turning into a carbonic acid solution that dissolved the rock. Over thousands of years, tiny crevices grew into long passages and deep caverns with an amazing collection of stalactites and stalagmites. The cave was well known to the Greeks and Romans and was the subject of many legends. It was thought to be a bottomless pit and the fantastic rock formations made it easy to believe that it was in fact the gateway to the underworld. Today the cave has shed its sinister reputation and is used for live shows, concerts and an annual world music festival. After visiting the cave, we will pay our respects to some of Gibraltar's most popular residents, the famous Barbary macaques, the only free-roaming monkeys in Europe. Legend has it that the monkeys arrived in Gibraltar from Morocco by following an underground passage under the Straits that ends at St Michael's Cave. The tour continues to the old town and the city centre before returning to the ship.
